

Dipartimento di Strutture per l'Ingegneria e l'Architettura (DiSt)

Martedì 24 aprile 2018, ore 9:30

Ing. Enrica Oliva

Partner and COO Werner Sobek New York Corp.

Structural Engineering challenges in the U.S. – high-rises, stadia, luxury residential projects

Abstract: 12 years in New York City as a structural engineer offer unique opportunities to face challenges and learn from them. This seminar will highlight my educational and career path - from Cassino to New York City - and some of the most significant engineering solutions I have developed as a Project Manager, a Director, and a Partner of internationally acclaimed Structural Engineering Companies.

Short BIO: Recipient of the 2018 "Rising Star Award in Structural engineering", Enrica has been the Director of Structures at Werner Sobek New York since 2016, and Partner and COO since 2017. She manages luxury residential and complex academic projects for the firm. Prior to joining Werner Sobek New York, Enrica worked as a Project Engineer at Thornton Tomasetti. She has a Bachelor of Science in Civil Engineering and Master of Science in Structural Engineering from the University of Cassino and Southern Lazio, and a Master of Science in Structural Engineering from Columbia University, and holds the titles of Adjunct Assistant Professor at the Architecture Schools of COLUMBIA UNIVERSITY and PRATT INSTITUTE.
